

4 LCY Lead-Calcium

FOR SWITCHGEAR APPLICATIONS
CAPACITIES FROM 248 TO 669
AMPERE-HOURS

C&D Technologies' flooded batteries are engineered to provide superior performance and reliability over the life of the product. These batteries are designed using proprietary techniques and quality components and materials for reduced maintenance and extended battery life.

APPLICATIONS

- **Electric Power Generation Facilities**
- **Electric Utility Substations**
- **Emergency Systems**
- **Manufacturing Facilities**
 - **Assembly Lines**
 - **Process Controls**
- **Petrochemical Processing Plants**
- **Pipelines**

FEATURES & BENEFITS

- High integrity bottom pour positive grid casting assures 20 year float life
- Four-cell design results in reduced rack length for optimum space utilization (shorter racks)
- Fewer bolted connectors per battery string reduce installation and maintenance costs
- Flame-retardant covers enhance battery plant safety
- Suspended positive plate permits free growth without pressure on jar and cover
- Snap-on intercell connector insulating covers
- Exposed terminals allow measurement of individual cell voltages
- 20 year environmental and seismic qualification
- Transparent container allows visual inspection of plates
- Electrical testing to 100 percent capacity assures performance of every battery

SPECIFICATIONS

Plates	Height	Width	Thickness
Positive	15 in. (381 mm)	12 in. (305 mm)	0.250 in. (6.4 mm)
Negative	15 in. (381 mm)	12 in. (305 mm)	0.180 in. (4.6 mm)
Outside negative	15 in. (381 mm)	12 in. (305 mm)	0.130 in. (3.3 mm)
Electrolyte height above plates	2.88 in. (73 mm)		
Sediment space	0.63 in. (16 mm)		
Electrolyte @ 77°F (25°C)	Sulfuric acid, 1.215 specific gravity nominal		
Recommended Float voltages (Avg. String Voltages)	2.21-2.22 volts per cell		
Container†	Thermoplastic, transparent		
Cover	High impact, flame retardant thermoplastic (PVC) with tongue and groove seal. Flammability ratings: UL 94-V0; LOI>33; ASTM D-635 self extinguishing		
Separator	Microporous with fibrous glass mat		
Safety vent system	Flame arrestor type with dust cover		
Terminals 4LCY-5 and 7 4LCY-9 and 11	Two 0.5 in. (12.7 mm) x 1.38 in. (35.1 mm) cast lead terminals Two 1 in. (25 mm) square posts per unit		
Withdrawal tubes	One per cell		
Intercell connectors 4LCY-5 and 7 4LCY-9 and 11	Welded connectors Bolt-on connectors—5/16-in threaded-copper inserts		
†Optional Container	Transparent, flame-retardant polycarbonate. Flammability ratings: UL 94-HB; ASTM D-635 self-extinguishing		
Special voltages	Models with dummy cells are available		

WHAT DOES THE C&D'S BATTERY SELECTION APPLICATION DO? WWW.CDSTANDBYPOWER.NET

The C&D's Battery Selection Application allows users to quickly calculate many values essential for the proper selection of standby battery product via an online application. This allows users to access all the information they need to size and select the proper battery without having to download and install software.

This includes the ability to:

- Select batteries based on complex step loads and generate IEEE-485 Sizing Work Sheets.
- Select batteries based on constant current loads.
- Select batteries based on constant power loads.
- View and customize rating tables.
- Do battery run time analysis.
- Calculate the hydrogen evolution rate.

Final Volts	Models	Nominal AH Rating*	Nominal rates at 77°F (25°C) in 1.215 Nominal SG. (includes connector voltage drop)

- Notes:
1. For more information on racks see brochure 12-560.
 2. Rack lengths for other than 60-cell batteries can be calculated by the formula: Number of cells per tier or step X (L+0.5)-0.5 = total rack length (Where "L" is length of cell.) Where dimensions are critical, check with C&D engineering.
 3. Rack width does not include thickness of crossbracing, increase width by 0.5 in. (12.7 mm) for crossbracing when this dimension is critical.
 4. Height measured from base to top terminal of upper tier battery.
