

X-CHANGER

Model XTC

Our X-Changer (XTC) is a battery transfer cart system designed for low volume with quick and easy installation.

The X-Changer (XTC) runs on an on-board 12Volt, DC battery system and is available with its own battery charger.

The standard X-Changer is designed with a 40" deep compartment to accept a maximum of a 4,000 lb. lift truck battery.

SELF CONTAINED

- Easy installation
- No outside electrical power required
- Push button pendant control
