

Eagletronic - Pulse

HIGH EFFICIENCY CONVENTIONAL & OPPORTUNITY CHARGERS

ETP Charging Profile "Wsa-Pulse"

FEATURES

1. The Eagletronic Pulse is the most Energy Efficient and Cost Effective Charger in its Class.
2. Maximizes battery life, reduces water consumption and maintenance with its patented Control Flux Pulse System.
3. Manual & Auto Equalize
4. Low Output Current Ripple means a reduced battery temperature.
5. Our exclusive Pulse system reduces the traditional constant finish rate, typically at 5 amps per 100 AH at every cycle by applying controlled high current pulses that stir the electrolyte in the battery efficiently and safely.
6. Network Monitoring and BID Capable.
7. Simple Design & Easy Repair than most chargers on the market.

EP4801 - single phase 208/240/480
EP4803 - three phase 208/240/480
